

Juice enough for a | Canadian giant

I can say that I'm very pleased to have installed the Thoosa 9000. It pushes the boat with authority. With only four batteries, I have more than enough juice to handle all my maneuvering. I certainly don't miss any of the exhaust or stink of diesel, and I don't have any fuel tanks, pumps, filters or best of all - any noise!

There is no idling in neutral, or warm up time, no cooling system, and no engine maintenance. It's perfect!

David Westergard
